rise starts as No 36 except the metal  
rise is still wider than No 40
- 42) Cave in die (one reverse has one metal Fm  
rise starts from between the R-1- of  
Pluribus and goes down along the  
right side of the O- of one and ends  
on top of the middle bar of the E-  
of cent

1941

fine (43) Cave in die (on reverse has two metal rise the first very narrow rise starts from the bottom of the right side of the -R- of Pluribus and ends near the right center top of the -O- of one the second one starts under the -S- of Pluribus and ends at the right top side of the -N- of one

E fine (44) Cave in die (on reverse has one metal rise starts under the right side of the -I- of Pluribus and goes down between the -O- -N- of one and ends on top of the -E- of cent

V fine (45) Cave in die (on reverse has two Metal rise the first one starts which is a very fine rise. from under the I of Pluribus and ends just a little above the center between the O- and -N- of one the second one also a very fine rise starts from the right side of the -S- of Pluribus and ends down at the left side bottom of the -E- of one

1941

- (46) Cave in die (on reverse has two metal rise the first one starts under the R- of Plumbus and ends on the right center top of the O- of one the second one start under the S- of Plumbus and ends on top of the right bar of the N- of one fine
- (47) Cave in die (on reverse has two metal rise the first one starts under the R- of Plumbus and ends at the right inside of the O- about half way down the second one starts under the S- of Plumbus and ends on top of the right bar of the N- of one also has a suction impression fine
- (48) Cave in die (on reverse has one metal rise starts under the R-1- of Plumbus and tapers down and ends half way down between the O- and N- of the one fine
- (49) Cave in die (on reverse has two metal rise the first one starts from between the I-B- of Plumbus and ends on the top of the left of the N- of the one. The second one starts from the bottom of the U- of Plumbus and ends on top of the right side of the E of one. fine

1941

- fine (50) Cave in die (has one wide taper metal rise on the reverse starts between the S- of Pluribus and the first U- of Unum and ends on the bottom of the left side of the E- of one
- V fine (51) Cave in die (on reverse has two metal rise the first one starts under the B- of Pluribus and ends on top of the left bar of the N- of one The second one starts from U- of Unum and ends on top of the end of the E- of one
- fine (52) Cave in die (on reverse has one metal rise starts from under the S- of Pluribus and ends on the top of the right bar of the N- of cent.
- fine (53) Cave in die (on reverse has one metal rise starts between the S- and U- of Pluribus and Unum and ends on full top of the E over the left of the side of the E of one.
- fine (54) Cave in die (on reverse has one metal rise and starts the same as No 53 except the rise take in the whole E- of one

1941

- (55) Cave in die (on reverse side has one metal rise starts from the dot between the S- and U- of Pluribus Unum and ends on the top of the E- of one, half of the dot still can be seen. fine
- (56) Cave in die (on reverse has one metal rise starts the same as No 55 except the dot cannot be seen. fine
- (57) Cave in die (on reverse has two metal rise the first one starts at the left of the dot between the S- and U- and ends on top of the left side of the E- of one the second one starts from the center of the U- and ends at the right top of the E- of one fine
- (58) Cave in die (on reverse has one very fine metal rise starts from the left of the dot and ends on top of the left point of the E- of one VF
- (59) Cave in die (on reverse has one metal rise starts from the left of the dot and under the U- of Pluribus and take in the whole letter E of one fine

1941

- fine (60) Cave in die (on reverse has one metal rise starts from the left of the dot and ends on the left point of the -E- of one
- fine (61) Cave in die (on reverse has one metal ~~and~~ rise starts from the right of the dot and ends on top of the full length of the E- of one
- fine (62) Cave in die (on reverse has one metal rise starts from the rim and takes in the -U- of Unum and the full length of the -E- of one
- fine (63) Cave in die (on reverse has two metal rise the first one starts under the -B- and ends on the left side of top of -N- of cent. the second one starts from the -U-N-U- of Unum and taper down and ends at the right center of the E of one.
- U.S. (64) Cave in die (on reverse has two metal rise same as No 63 except the second one stops at the right top of the -E- of one

1941

- (65) Cave in die (on reverse has one metal rise starts between the the U- and -N- of Unum and ends on the top of the -T- of cent g-
- (66) Cave in die (on reverse has two metal rise the first one starts from between the P- and -L- of Pluribus and ends at the left side of the -O- of one about half ways down - the second one starts from the bottom of the U- of Pluribus and ends on the center top of the -E- of one 1/2
- (67) Cave in die (on reverse has two metal rise the first one starts from the rim take in the -L- of Pluribus and ends at the left side of the -O- of one about half way down The second one starts between the U. N- of Unum and ends at the right side of the E- of one about half way down - of the E- of one fine

1941

- fine (68) Cave in die (on reverse has two metal rise the first one starts from the rim and takes in the P-L-U- of Plumbus and the L- is slightly block out and ends on the upper left side of the O- of the one The second one starts from under the -N- of Unum and ends on top of the -T- of cent.
- V 8 (69) Cave in die (on reverse has two metal rise the first one starts from the rim and takes in the L- and U- of Plumbus and ends on the left top of the O- of one The second one starts from the rim also and between the S- and U. of Plumbus Unum blocking out the dot and ends on the left top of the E- of one
- Ex 7 (70) Cave in die (on reverse has two metal rise the first one starts like No 69 and the second one starts from the rim at the left side of the bottom of the S- and ends at the left side of the top center of the E- of one

1941

(71) Cave in die (on reverse has two EF  
metal rise the first one starts from  
the rim takes in the L- of Pluribus  
and ends half way down the  
left side of the O- of one The  
second one starts from the bottom  
of the U- of Unum and ends on  
the right side of the E- of one

(72) Cave in die (on reverse has three EF  
metal rise the first one starts from  
under the R- of Pluribus and ends  
at the right top of the O- of one  
The second one starts from the  
left side of the S- of Pluribus and  
ends on the right side of the N-  
of one The third one starts from  
the bottom of the U- of Unum  
and ends on the right top point  
of the E- of one this one is very  
light

(73) Cave in die (on reverse has two V.G.  
metal rise the first one starts from the  
rim and takes in the U- of Pluribus and  
ends on the left top of the O- of the one  
The second one starts from the  
dot - U- N- of Unum and ends on  
the left top of the E- of one

1941

VI- (74) Cave in die (on reverse has one metal rise starts from the rim takes in the -L- of Pluribus goes down and ends about in line of the bottom of the -O- of one

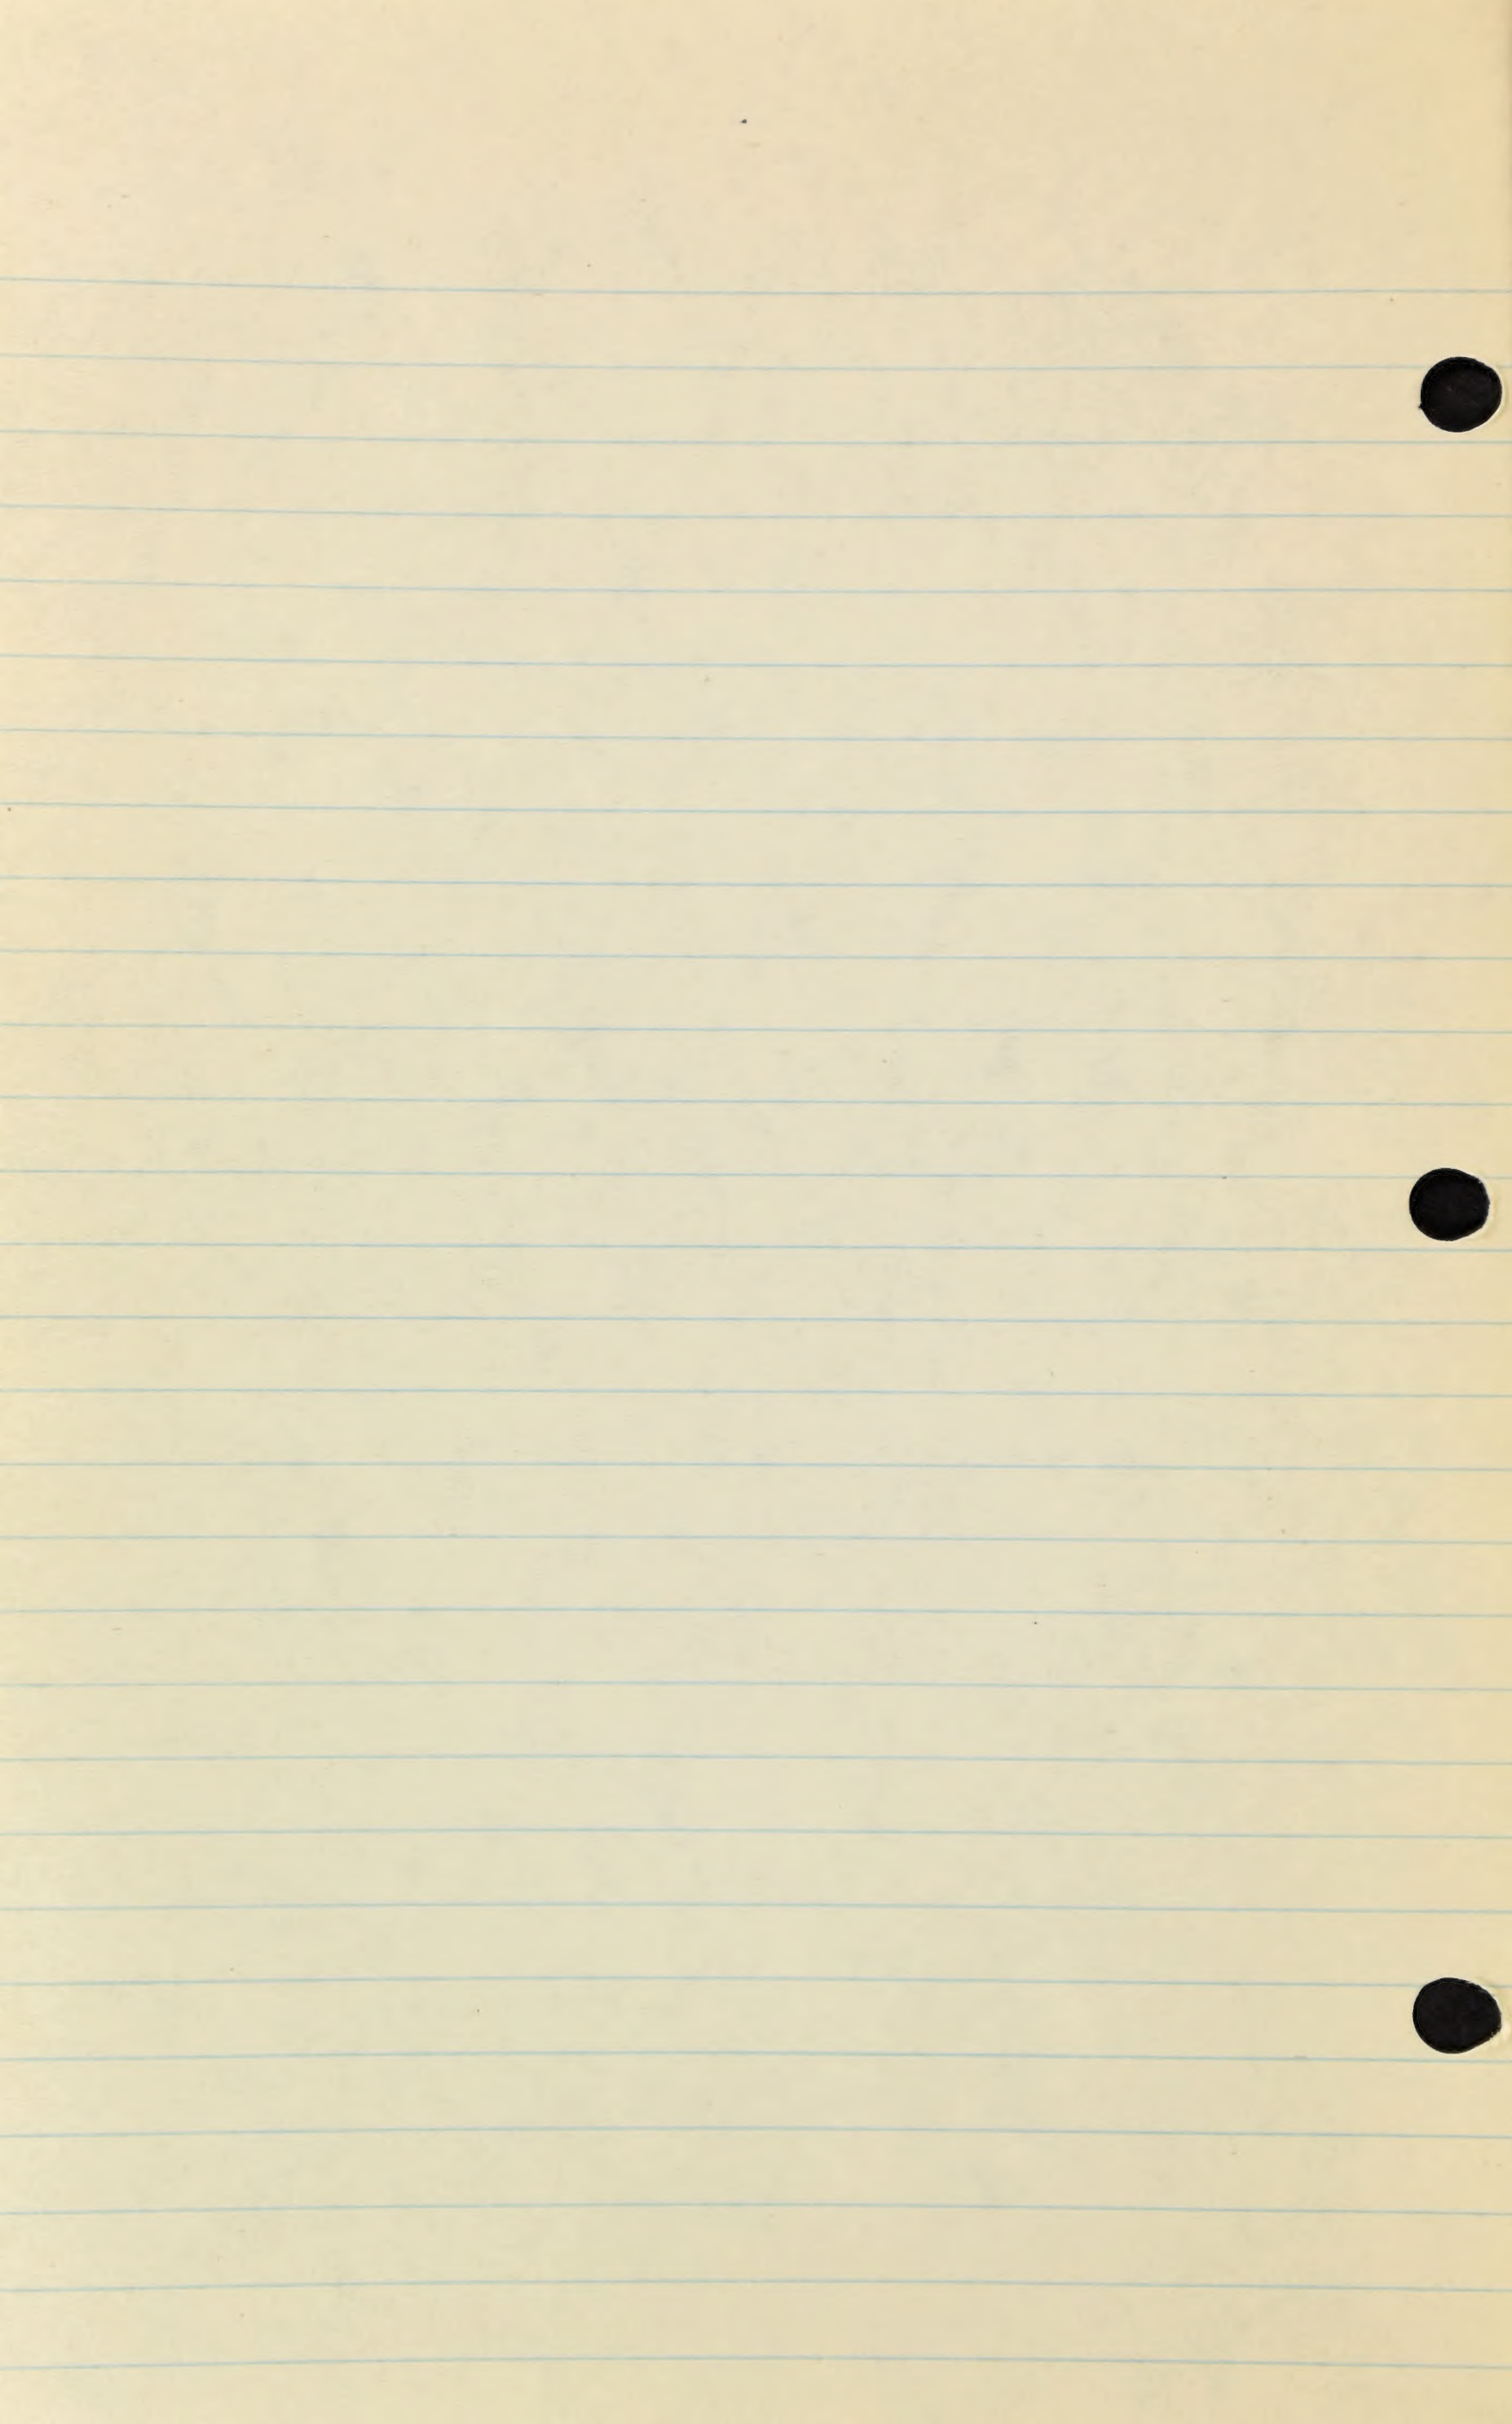

V-F (75) Cave in die (on reverse has one metal rise starts under the dot and ends on the full top of the -E- of the left half also has suction impression

V-F (76) Cave in die (on reverse has two metal rise the first one starts from the -L- of Pluribus and ends on the left side of the -O- of one the second one starts from the -R- and ends on the right top side of the -O- of one

four (77) Defected die (on obverse the one of the last figure is lower and slant to the left.

VG (78) Defected die (on reverse has a long rise starts from the -I- of Pluribus and goes down through the -O- of one and the -E- of -cent and ends on the -E- of United also has suction impression

un

75

Cave in die (on reverse has one metal rise starts between S and -dot-U- about  $\frac{1}{32}$  wide of Pluribus Unum the right half ends on the left top of E- of one the other half ends about  $\frac{3}{4}$  ways of the same E on the left side

8

1944

- Good (76) Cave in die (on reverse has one metal rise starts at the left top side of the -E- of one and ends at the bottom of the -E-
- u (77) Cave in die (on reverse has one metal rise starts at the top center between the -N- and -E- of one and ends on the top of the right side of -N- of cent
- b (78) Cave in die & on reverse has two metal rise the first one starts from the rim takes in the -S- and goes down straight and ends at the bottom of the right side of the -N- of one. The second one starts also from the rim very wide it takes in the U-N-U- of Unum like a triangle it come to a point, takes in the whole -E- of one and ends at the left inside corner of same E.
- U fine (79) Cave in die (on reverse has one metal rise starts from under the S-Dot-U-N-U of Pluribus Unum the left side of metal rise goes down and ends on the top of right side of the -N- of cent the right metal rise takes the whole -E- of one and the left top of the -T- of

1944

— cent and ends on the half upper of the N in cent the Unum letter are very strong

(80) Cave in die (on reverse has one rise starts and ends like No 79. Except the U-N-U-M are weakly stamp

(81) Cave in die (on reverse has one rise the rise is much more heavier than No 79 and No 80... also has letters like No 80 weakly stamp

(82) cave in die (on reverse has one metal rise starts at the rim and goes down between the N- and E of the one and ends at the bottom of the N- and E

(83) Cave in die (on reverse has two metal rise the first is like No 74 the second one starts at the left side of the C of cent and ends on the top of the U- of United

(84) Cave in die (on reverse has three metal rise the first one starts under the right side of the S- of Pluribus goes down the left side of the E- of one ends at the bottom of the same E- The second one starts is very narrow and ends about in line of the

1944

- center of the E of one - the third one starts from the bottom of the right side of the -M- of the Unum and ends on the top of the right wheat blade -

u (85) Curve in die (on reverse has one metal rise starts very wide takes in the B-U-S- and dot-U of Pluribus Unum and ends about the center line of the -E- of the one

u (86) Curve in die (on reverse has two metal rise the first one like no 82 and the second one starts at the right top of the -N- of cent and ends under the left corner of the -E- of one

u (87) Curve in die (on reverse has one metal rise starts from the rim very wide takes in the -U-N-U- like a triangle it come to a point and takes in the full half of the E of one and ends in the left inside corner of the E-

fine (88) Curve in die (on reverse has on metal rise starts between the S- and U- and -N- of Pluribus Unum and end on the top of the E of one.

1944

- (89) Cave in die (on reverse has one metal <sup>fine</sup> rise starts under the U- and ends on the left side of the E- of one
- (90) Cave in die (on reverse has one metal <sup>fine</sup> rise starts under the U-N- and ends on the full top of the E- of one
- (91) Cave in die (on reverse has one metal <sup>u</sup> rise starts under the U-N-U- of Unum and takes in the whole E- and one part of the rise ends between the N- and T- of Cent. just below the cross line of the T- of cent and the right part in the top of the T of cent
- (92) Cave in die (on reverse has two metal <sup>u</sup> rise the first one starts from the rim takes in the P-L-U- of Pluribus and ends there the second one starts from the U-N-U-M of Unum and ends on the right side top of the E of one real heavy.

1944

u (93) Cave in die (on reverse has two metal rise the first one starts along the rim at take in the U-N-U-M- of Plunum and ends at the rim the second one starts under the U- of Plunibus and ends at the right top of the -E- of one.

u (94) Cave in die (on reverse has two metal rise the first rise is like No 93 and the second one starts like No 93 and ends on the right top side corner of the -E- of one.

u (95) Cave in die (on reverse has one metal rise starts at the left side of -U- of Plunibus goes down through the right side of the -E- of one and ends on the left top of the T of cent

u (96) Cave in die (on reverse has one metal rise starts between the -E- of one and the right wheat blade about in line with the center of the cross bar of the E of one and ends at the bottom bar of the E of one

1944

- (97) Cave in die (on reverse has one metal rise starts at the bottom bar of the E of one and goes down through the center of the T of cent and ends about half way down u
- (98) Cave in die (on reverse has one very wide metal rise starts under the U N U of Unum goes down the right side of the E through of one the center of the T of cent and ends at the bottom of the same T. fine
- (99) Cave in die (on reverse has one very wide metal rise starts from the center cross line of the E of one and ends at the bottom of the T of cent fine
- (100) Cave in die (on reverse has one wide metal rise starts from the right center bar of the E of one and ends at the bottom of the T of cent u

1944-S

1944

u

(101)

Curve in die (on reverse has five metal rise the first one starts under the U- of Unum and ends ~~on~~ top of the right bar of the T- of cent the second one starts under the M- of Unum and ends along the side of the first rise the other three starts under the T- of Unum and ends on top of the Right wheel blade

u

(102)

Crack die (on reverse crack starts between the E- of one and T- of cent in the center of both letters on a 15 degree angle

u

(103)

Crack die (on reverse crack start from the right tip of the V- of cent and has a slight curve and ends on the left hand side of the E- of one

u

(104)

Curve in die (has two metal rise on reverse the first one starts between the P- and L of Pluribus goes down through the C- of cent and ends on the top of the N- of United the second one starts under the center of the E- of one, goes down through the T- of cent and —

1944

- ends at the bottom of the same  
-T-

(105) Cave in die (one reverse has three metal rise the first one starts under the -L- and U- of Pluribus goes down through the left side loop and through the right tips of the C- of cent and ends at the inside bottom of the C of cent the second one starts under the -N- of Unum goes down through the right tip of the -E- of one and ends on the right top bar of the T of cent the third one does likewise also the letters P-L-U- are very weakly stamp.

(106) Cave in die (on reverse has three fine metal rise the first one starts wide under the rim takes in the -P-L-U- of Pluribus goes downward and ends on the inside bottom of the left loop the second one starts under the -S-U- of Pluribus and ends at the bottom of the left side of the -N- of one the third one starts under the -W- and ends on the right top bar of the -T- of cent

1944

- u (107) Cave in die (on reverse has two metal  
use the first one starts under the P-  
-L-U- and ends on the inside the  
bottom loop of the C- of cent The second  
one is very narrow starts under the  
U of Union and ends on the right  
top bar of the T- of cent
- u (108) Cave in die (on reverse has two metal  
use the first one starts at the left side  
of the O- of one just about in line of the  
-O- goes down through the C- of cent  
and ends at the right top of the N-  
in United The second one starts from  
the rim takes in part of the lower  
right-S- and the left of the U of Plumb  
and ends on the left top bar of  
the E- of one the left part of the  
use ends between the N-E of one  
the dot is also blank out.
- Q.W. (109) Same as No 108 Except the dot  
is not blank out.

1944

110

Cave in die (on reverse has two metal rise the first one starts wide from the rim between the U- and U of Pluribus take in the R-I-B of Pluribus and ends at the bottom of the O- and the left bar of N- of one the second one is also wide starts between the S- and U of Pluribus Unum and take in the U-N- and the whole E- and ends at the bottom of the E- of one

E-F-

111

Cave in die (on reverse has two metal rise the first one starts from rim between the E and R. Takes in the P-L-U- of Pluribus these letters are very faint goes down the left loop of the O- of one and fill the inside of O to the tips and ends at the bottom of the F and A- of America, the second one at the rim take in the U-N- of Unum and goes down about the right tip of the E- of one and ends on the T of sent.

fine

1944

- fine (112) Cave in die (on reverse has one metal rise and starts at the center top of the -T- of cent and goes up on a angle and ends at the left side near the top of wheat blade. also suction impression
- W (113) A very sharpe suction impression on reverse
- EF (114) Cave in die (on reverse has two metal mounds one under the C of cent and the second one between the N- and T of cent also a heavy suction impression
- W (115) Crack die (on reverse the crack starts from the rim at the left side of the left wheat blade. goes through the wheat blade in about the line of the bottom of the E- of cent then goes down in a half circular and ends on top of the left side top of the U- of United also suction impression

1944

- (116) Cave in die (on reverse has one metal rise starts at the right side center of the E of one goes down straight at the right center of the T of cent the other part of the rise goes down on ends on a angle through the right wheat blade and tapers back to the bottom of the T of cent
- (117) Cave in die (same as No 116. except fine the metal rise is wider
- (118) Cave in die (on reverse has two fine metal rise the first one starts at the bottom of the P of Pluribus goes down straight very lightly and in about in line of the C of cent and ends on the left of the O of - of - at the right side of the left Wheat blade The second one starts just a little about the T of cent and goes down straight and ends at right of the A in America on the left side of the right wheat blade.

H (119) Cave in die (on reverse has one metal rise starts at the rim under the left wheat stem and goes up a slant and ends just about the top of the right wheat blade stem

V.G (120) Cave in die (on reverse has two metal rise the first one starts under the center of the M- of the Unum and goes down straight at the left top of the right wheat blade, The second one starts at the right side of the M- of Unum and ends on top of the right wheat blade-

fine (121) Cave in die (on reverse has one metal rise starts between the E- and P- of E Pluribus goes right of the left wheat blade and ends on the top of the U- of United

fine (122) Cave in die (on reverse has four metal rise the first one starts from the rim and ends at the left wheat blade, the other three starts from the U- Unum and ends at the wheat blade

V.F. (123) Cave in die (on reverse has two metal rise

V.F. (124) Cave in die (on reverse has four metal rise

(125)

1944

V.F. Defected die (on obverse Lincoln has a metal  
ridge on his vest, looks like a button.

V.G. (126) Defected die (on reverse has a metal rise  
on both wheat blade starts from the rim  
and goes down and ends a little ways  
down the wheat blade

V.F. (127) Defected Material on obverse The material  
is broken right down the center.

(23)

Center S. (S-under the 4 Crack die (on reverse has two crack, starts of the first and the second closed together starting from the rim the first one ends at the left of the right wheat blade the second one ends on the top of the right wheat blade also a heavy suction impression

u

(24)

High-S- under the 4. Crack die on reverse crack starts under the left part of the N- of Unum and ends at the left side top point of the right wheat blade On Obverse the letters of In God We Trust are flat also on the reverse a metal rise starts at the rim and ends on the right top of the right wheat blade.

u

(25)

Center S (cave in die) has six metal rise, the first one starts left of the E- at the rim goes down on both side of the left wheat blade and ends about the center of the cent, the second and third one starts under the R-1- of Pluribus and ends at the right side of the O- of one about the center, The fourth one starts

1944-5

— Unum. very wide and Tapers down  
Takes in the E- of one and ends  
at the bottom of the inside bar of the  
- E- the same one. The fifth one starts  
wide about in line of the center of  
the E- of one and ends on the bottom of  
the T- of cent on the right side. The  
six one starts from the rim and  
goes down on the both side of the  
right wheat blade and ends about  
the same as the first one.

(26) Center S (Cave in die has one metal  
rise on reverse starts under the P-  
and L- of Pluribus and ends in the  
very heavy suction impression along  
the left side of the O- of one

(27) High S (Cave in die has three  
metal rise and seven fine impression  
between the three metal heavy rise  
which look like a lot of fine scratch  
marks the first rise starts under  
the N- of Unum and ends on top  
of the right top side of the T- of cent  
and the second one starts under  
the U- of Unum about a sixteen of  
an inch at the right top of the T-  
of cent. The third one starts —

1944-5

under the M- of Unum and ends about in line of the second metal rise. The E and M- of E. Pluribus Unum are badly blur. There is also a crack which starts from the right center of the right wheat blade and ends at the rim edge.

fine (28) Center-S- (cave in die has three metal use on reverse the first one starts under the U-W of Unum and goes down at the outer right side top of the E- of one and part of it ends on top of the E- of one and the other part on the right side and ends about the center of the -T- of cent. The second one starts about a thirty second of a inch left of the right wheat blade in line of the bottom bar of the E- of one and ends about the same as the first rise. The third one starts at the rim above the right wheat blade and ends on the top of same also has a heavy suction impression.

1944-S

29

High-S - (Cave in die on reverse has two metal rise the first one starts under the P and L of Pluribus and ends on the left top loop of the C of cent. The second one starts under the U-M-U- and goes down through the F- and ends on the top of the T- of cent. also letters E-P-L of E. Pluribus are flatten out and the upper half of U-N-U-M- also are flatten out and on obverse the letters of In God are flatten also has suction impression

30

Center S (S under the 4 (on reverse has two metal rise Cave in die. The first one start wide from the rim takes in the U-R-I- of Pluribus and goes down through the O- of one and the C- of cent and ends at the bottom of C- of cent the second one starts under the U-N- of Unum and ends on the top of the T- of cent

1944-5

u (31) Center S (Cave in die on reverse has nine metal rise. the first one starts very wide under the rim takes in the P-L-U-R- of Pluribus and goes through the O- of one and ends on top of E- of cent the second and third and fourth starts under the S-dot-U-N- of Pluribus Unum and goes down through the E- of one on both side and ends on top of the T- of cent, the fifth and sixth and seven and eight and nine starts from the rim takes in the N-U-M- of Unum and ends about in line of the top of the right wheat-blade.

fine (32) Center S- (Cave in die on reverse has about sixteen metal rise and all starts from the upper rim and takes in all of the letters of E- Pluribus Unum. and all ends about the center of pernie.

u (33) Low-S- (S-slants to the right as a small bottom loop. Cave in die on reverse has twenty two metal rise the first and second one starts from the L-U-R- of Pluribus these letters are weak the metal rise goes down through the O- of one and ends

1944-5

on the top of the E- of United. The fourth one starts under the U-S- of Pluribus, goes down the right of N of one and through the N- of cent and ends on top of S-T- of States. The fifth, sixth, seven, eight rise starts about under the U- of Union and goes down through the E- of one ends between the N-T- at the bottom. The rest of the rise all starts from the rim and ends about in line of the top bar of the T- of cent.

(34)

Low S (have in die on reverse u) has twenty-three rise the first thirteen starts from the left side rim takes in all these letters E-P-L-U-R-I- of E. Pluribus goes down straight and ends at the bottom of the O-F of of. The other ten starts in a line of the E- of one goes down and some ends on the top of the T- of cents and the rest ends about in line of the bottom of the T- of cent. The letters of E-P-L-U-R-I are very weakly stamp.

U (35) Center S-(cave in die has nineteen metal  
 rises on reverse the first nine starts from the rim  
 and goes down through the O-and half of the N-  
 of one and the C-and E-of cent and ends on  
 the top letters of United the other ten starts from  
 the rim takes in the U-N-U-M-and ends about  
 in line at the bottom bar of the E-of one. The  
 letters of E. Pluribus are very weakly struck.

U (36) Low-S-S-under the H (cave in die on reverse  
 has seven metal rise the first one starts at the  
 rim from the E-to B-of Pluribus and ends  
 at the right top rim. The second one starts under  
 the L-of Pluribus and ends on the left top  
 of the loop of the C-of cent. The third one starts  
 at the left center side of the O-of one and  
 ends on the right top of the C-of cent. The fourth  
 one starts from the U-R-T-of Pluribus goes down  
 through the O-of one and ends on the top of the  
 E-of cent. The fifth one starts under the U-of  
 Unum goes down the right inside of the E-of  
 one and ends on the bottom of the E-of one  
 the sixth one starts about the center of the E-  
 of one between the right wheat blade and ends  
 at the bottom of the E-of one and the other part  
 ends on the top center of the center T-of cent.  
 The seventh one starts under the M-of Unum  
 and ends at the left side of the right wheat  
 blade in line of the lower bar of the E-of one

- (27) Cave in die (on reverse has one metal rise starts under the U-R- of Pluribus goes down through the right side of the O- of one and ends on the left top bar of the E- of cents

1945

28

Cave in die (on reverse has two metal rise the first one starts between the -U-R- of Pluribus and ends on top center of the O- of one the second one starts between the U-S- of Pluribus and ends on the right top bar of the N- of one

29

Cave in die (on reverse has two metal rise the first one starts between the P- and R- of Pluribus takes in the T-U- of Pluribus and ends on the center top loop of the O- of one The second one starts wide from the rim takes in the U-M- of Numm to the right top of the right wheat blade and at the left of wheat blade goes down and ends straight across the right top bar of the T- of cent to the left side of the right Wheat blade.

30

Cave in die (on reverse has seven metal rise the first one starts under the R-I- of Pluribus goes down through the right side loop of the O- of one and down through the E- of one at the right side and ends at the bottom of the E of one. The second one starts at the U- of Pluribus and goes down -

1945

through the N- of one and ends on the right top bar of the N- of cent. The third one starts under the S- of Pluribus goes down along the right side of the N- of one and ends at the bottom of the N- of one. The fourth one starts at the rim at the right of the S- of Pluribus and goes down about one eighth of an inch and ends there. The fifth one also starts from the rim left of the E- and ends on the left top bar of the E- of one. The sixth one starts at the right of the U- of Pluribus and ends at the right top of the E of one. The seven one starts from the rim right of the M- and ends at the right top side of the right wheat blade.

(31) Cave in die (on reverse has one metal rise starts inside of the lower half of the N- of one and ends on the left top bar of the N- of cent. u

(32) Cave in die (on reverse has two metal rise the first one starts along the rim between the E- takes in the P- L- of E. Pluribus and ends at the left side of the U- of Pluribus the second one starts just a little above the top of

1945

the right side bar of the N- of one and goes down through the inside of the right bar of the N- of one and ends on the right top of the left bar of N- of cent

EL (33) Cave in die (on reverse has one metal rise starts under the M- and ends at the right top side of the right bar of the N- of one

u (34) Cave in die (on reverse has two metal rise the first one starts under the B- of Pluribus goes down through the inside of the left bar of the N- of one and ends at the left of the top side of the N- of Cent The second one starts at the upper rim and takes in the U- and ends on the top of the full bar of the E- of one.

u (35) Cave in die (on reverse has three metal rise starts at the right of the U- of Pluribus goes along the rim takes in the R- I- B- and ends at the left of the U- of Pluribus The second one starts under the B- goes down through the inside of the left bar of the N- of one and ends at the left of the top side of N- of cent

1945

The third one starts at the right center space of the E- of one and goes down the right bottom bar of the E- of one and ends just about a sixteenth of an inch under the top bar of the T- of cent

36

Cave in die (on reverse has three metal rise the first one starts along the rim takes in the L-U-R and ends at the B- of Pluribus the second one starts wide under the N-S of Pluribus and goes down both side of the right bar of the N- of one takes in the full W- of cent and ends on the top of E-R- of America the third one starts also wide on the inside of the E- of one ends on top of the T- of cent. Also suction impression

37

Cave in die (on reverse has one metal rise Starts under the right of the S- and goes down along the left side of the S- and goes down and end on the right top bar of the N- of cent

38

Cave in die (on reverse has one wide metal rise starts from the upper rim and takes in the part of the right side of the S- of Pluribus and the dot and the NW- of Anum and goes down straight between

1945

the N-E of one and takes in the full  
-E- of one and ends at the bottom of  
the E- of one

39

Cave in die (on reverse has two metal  
rise the first one starts at the upper  
rim takes in the full U- of Pluribus and  
goes down and ends on the top center  
of the O- of one The second one starts  
also from the rim takes in the dot which  
is between the S- of Pluribus and the U-  
of unum and goes down and ends  
on the left top of the E- of one

40

Cave in die (on reverse has two metal  
rise the first one starts about a sixteenth  
of an inch at the right side of the O-  
of one goes down between the O-N- of  
one and ends on the center of the  
E- of cent the second one is like No 38

41

Cave in die (on reverse has one metal  
rise starts between the S- and U- and  
goes down and ends on the left top  
bar of the E- of one

1945

(42) Cave in die (on reverse has one metal fine  
monded about the center between the  
-E- of one and the right wheat blade  
just below the U-M- of Unum and the  
top of the -T- of cent.

(43) Cave in die (on reverse has one metal EF  
rise starts between the U-N- of Unum  
goes down the outside of the right tips  
of the bar of the E- of one and ends  
at the bottom tip of the E- of one

(44) Cave in die (on reverse has one metal unc  
rise start about one-sixteenth of the inch  
off the right tip of the E- of one and  
is the same length as the E- of one  
also suction impression

(45) Cave in die (on reverse has one metal u  
rise starts about the bottom inside of  
the E- of the one goes down on a slight  
angle and then up and ends just  
under the U- of Unum,

(46) Cave in die (on reverse has one metal  
rise starts under the U- of Unum goes  
down between the E- of one and the  
right wheat blade and ends about  
in line of the left top of the right  
wheat blade.

1945

47

Cave in die (on reverse has two metal rise the first one starts under the U- of Pluribus and ends on the top of the left top loop of the O- of one. The second one starts wide under the U- and M- of Unum and goes down and ends down and ends on the right side tip of the T- of cent and straight across to the right wheat blade.

48

Cave in die (on reverse has four metal rise the first one starts along the upper rim at the right side of the E- Takes in the P-L-U of Pluribus and ends there. The second one starts wide under the P-L-U- and goes down and ends at the left top side of the O- of one and the full length of the O-. The third one starts also ~~from~~ the rim right of the N- of Unum takes in the U-M- of Unum ends near the right top side of the right wheat blade. The fourth one starts under under the U-M- of Unum and goes down straight and ends about the half the length of the T- of cent.

1945

49

Cave in die (on reverse has three metal rise the first one starts under the U- of Pluribus goes down on an angle through the center of the O- of one and ends at the left bottom side of the E- of Cent. The second one starts at the left bar of the M- of Unum and ends at the left outside tip of the right wheat blade. The third one starts under the right of the M- of Unum and ends also on the right wheat blade.

50

Cave in die (on reverse has two metal rise the first starts under the U- R- of Pluribus and goes down through the right inside loop of the O- of one and ends at the bottom of the same O-. The second one starts under the U- and ends at the right top of the E- on one.

51

Cave in die (on reverse has one metal rise starts at the inside bottom of the O- of one goes up on an angle through the N- of one and ends at the top left end side of the E of one.

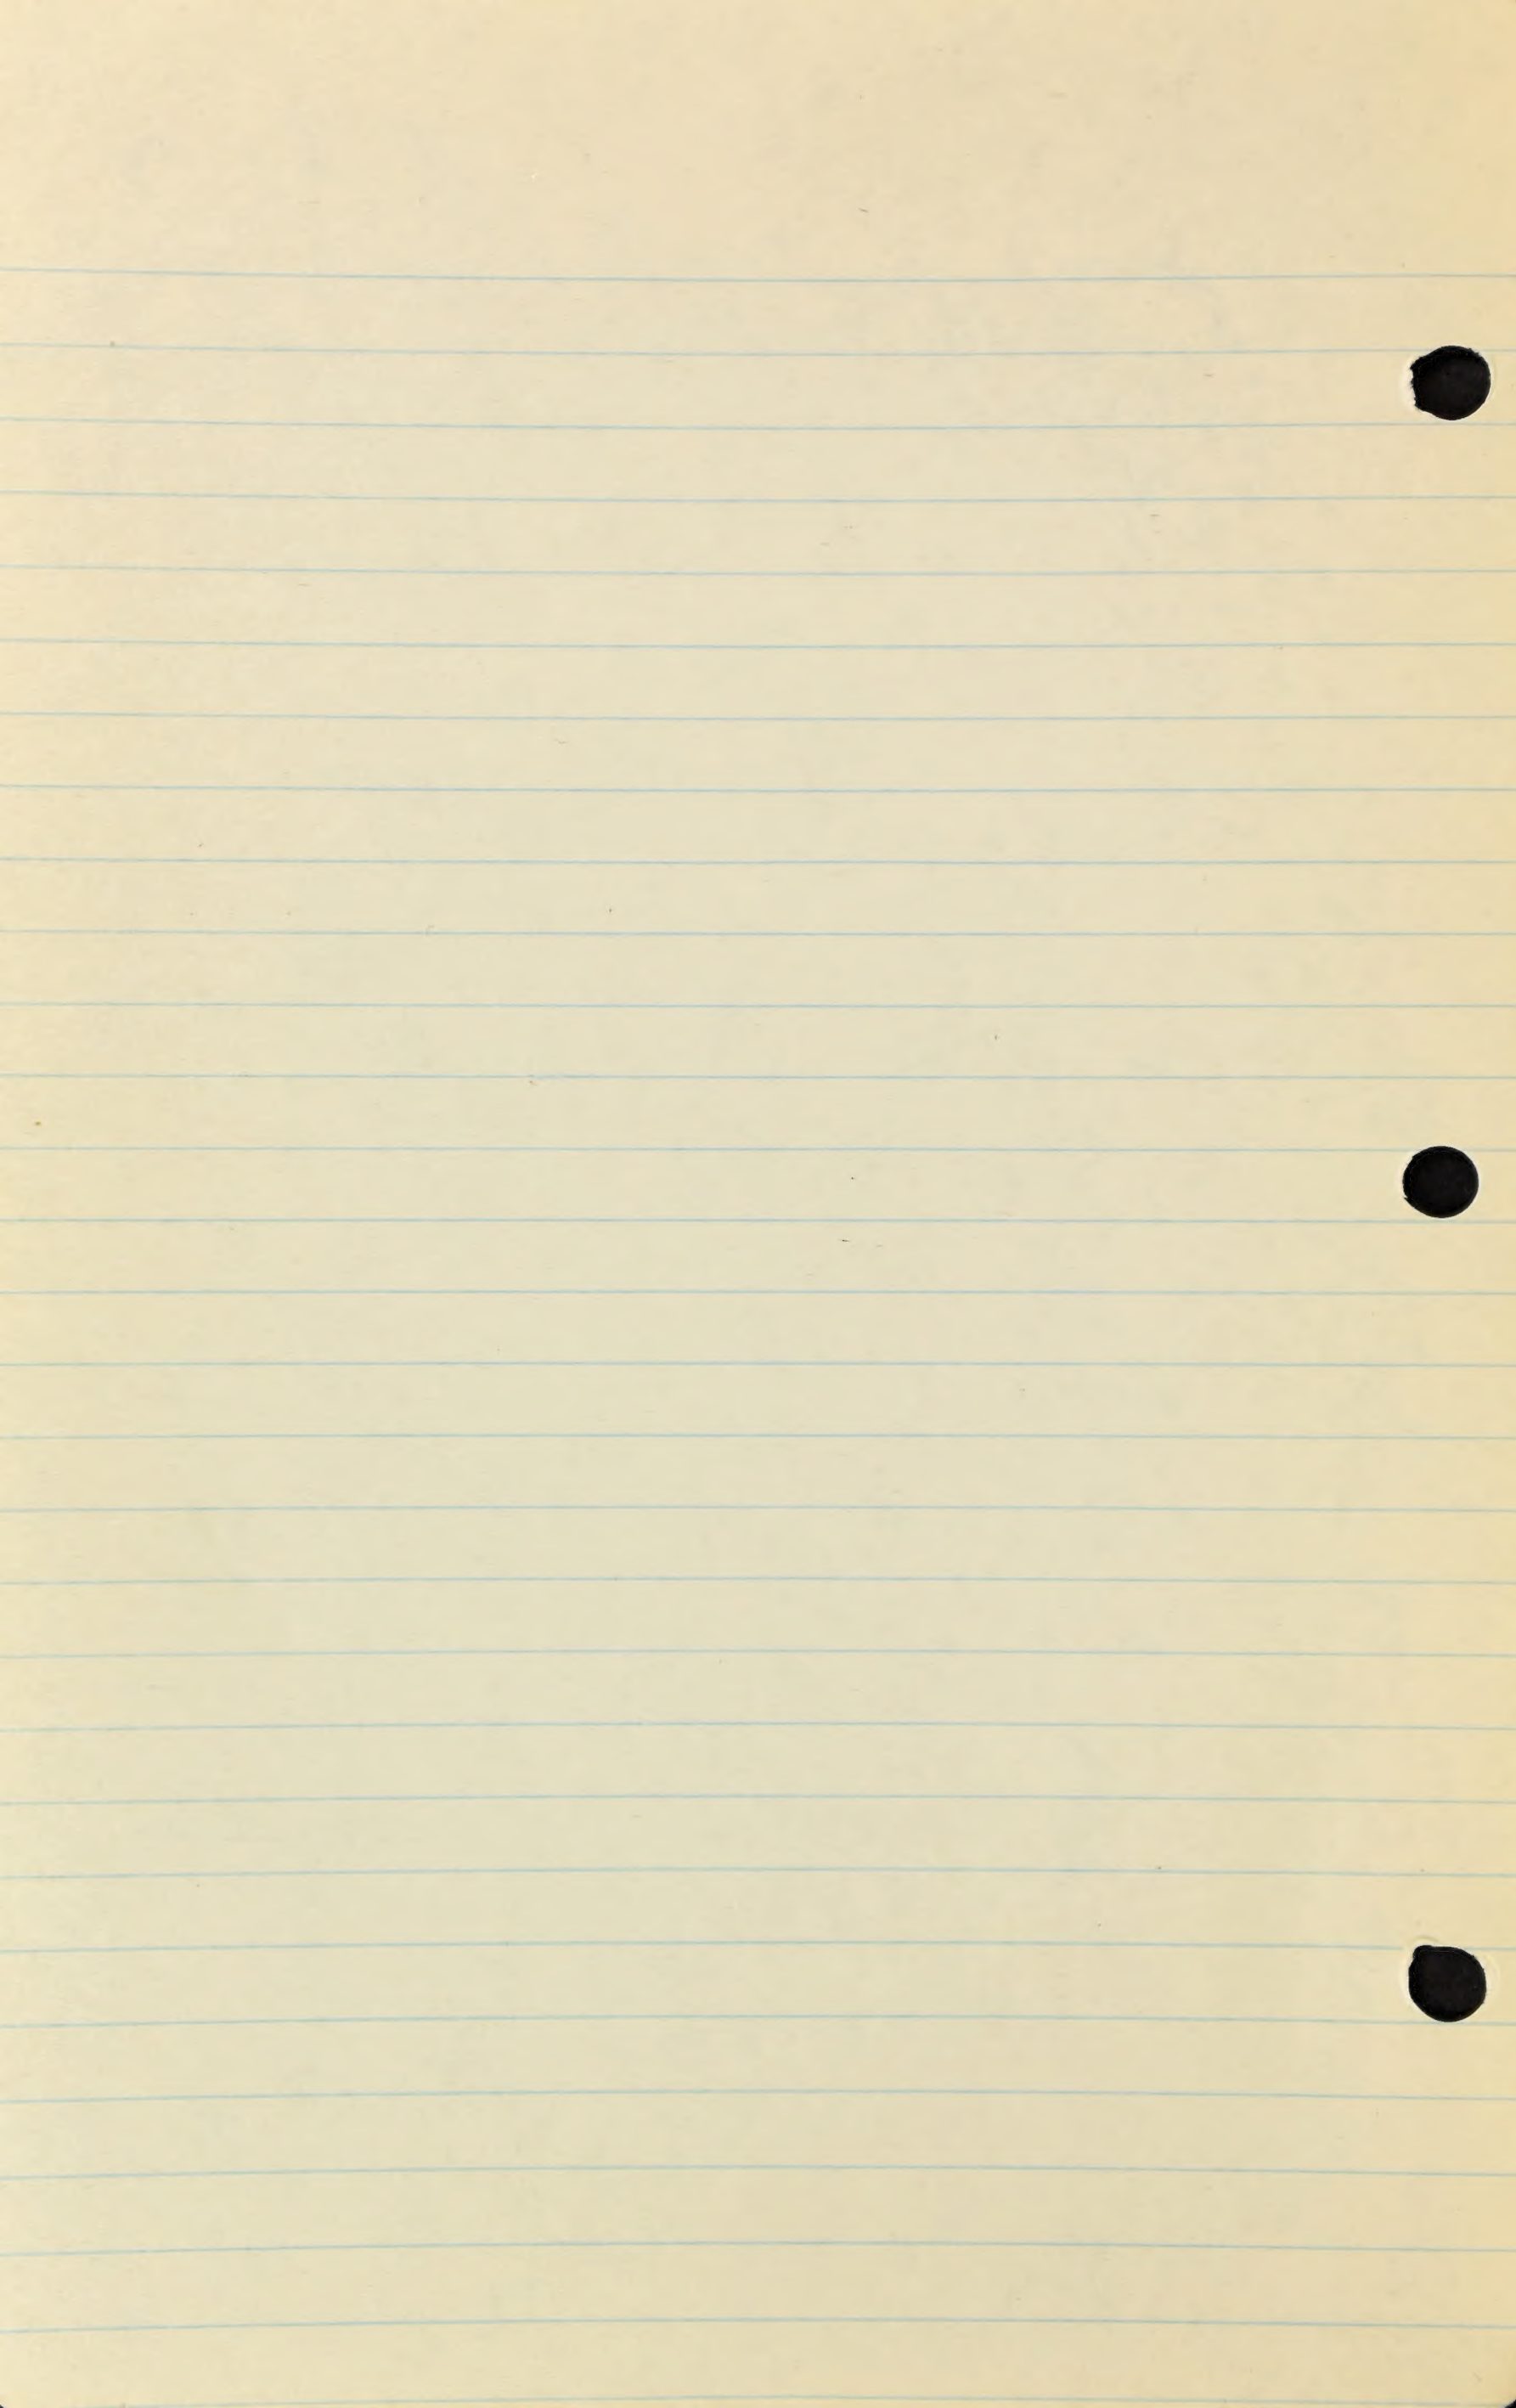

1945

U (52) Cave in die (on reverse has a very sharp die cut which shows a strong impression from the bottom of the C- of cent and goes on a angle at the left through the C- and ends on the inside of the upper loop of the C-

Line (53) Crack die (on reverse has a crack starts from the -L- of Pluribus and goes down to the C- of Cent.

G (54) Defected die (on obverse has a metal mound on the center of the -Y- of Liberty.

the United States is missing.

1947

u (1) Perfect die

u. (2) Defected die (on obverse has a sharp edge which is cause by being roll over into the letters In God We Trust and on obverse also the letters - L - of Liberty is wide and flat

u. (3) Defected die (on reverse the letters of - P - L - U - R - I - of Pluribus are very weakly struck also the upper left top of the - O - of one, and also a crack from the rim, goes down and ends on the right wheat blade

u (4) Thick cent = 0.68 which is .005 thousand over size.

u (5) Crack die (on obverse has on crack starts from the back of the head goes to the center of the ear then up around the ear then up the head at the hair line then across to the top of the head under the hair line and ends at the hair of the center forehead.

u (6) Curve in die (on reverse has three metal rise the first one starts wide from the rim takes in the U - R - I - and the bottom of the the B - U - S - the dot - U - IV of Pl.

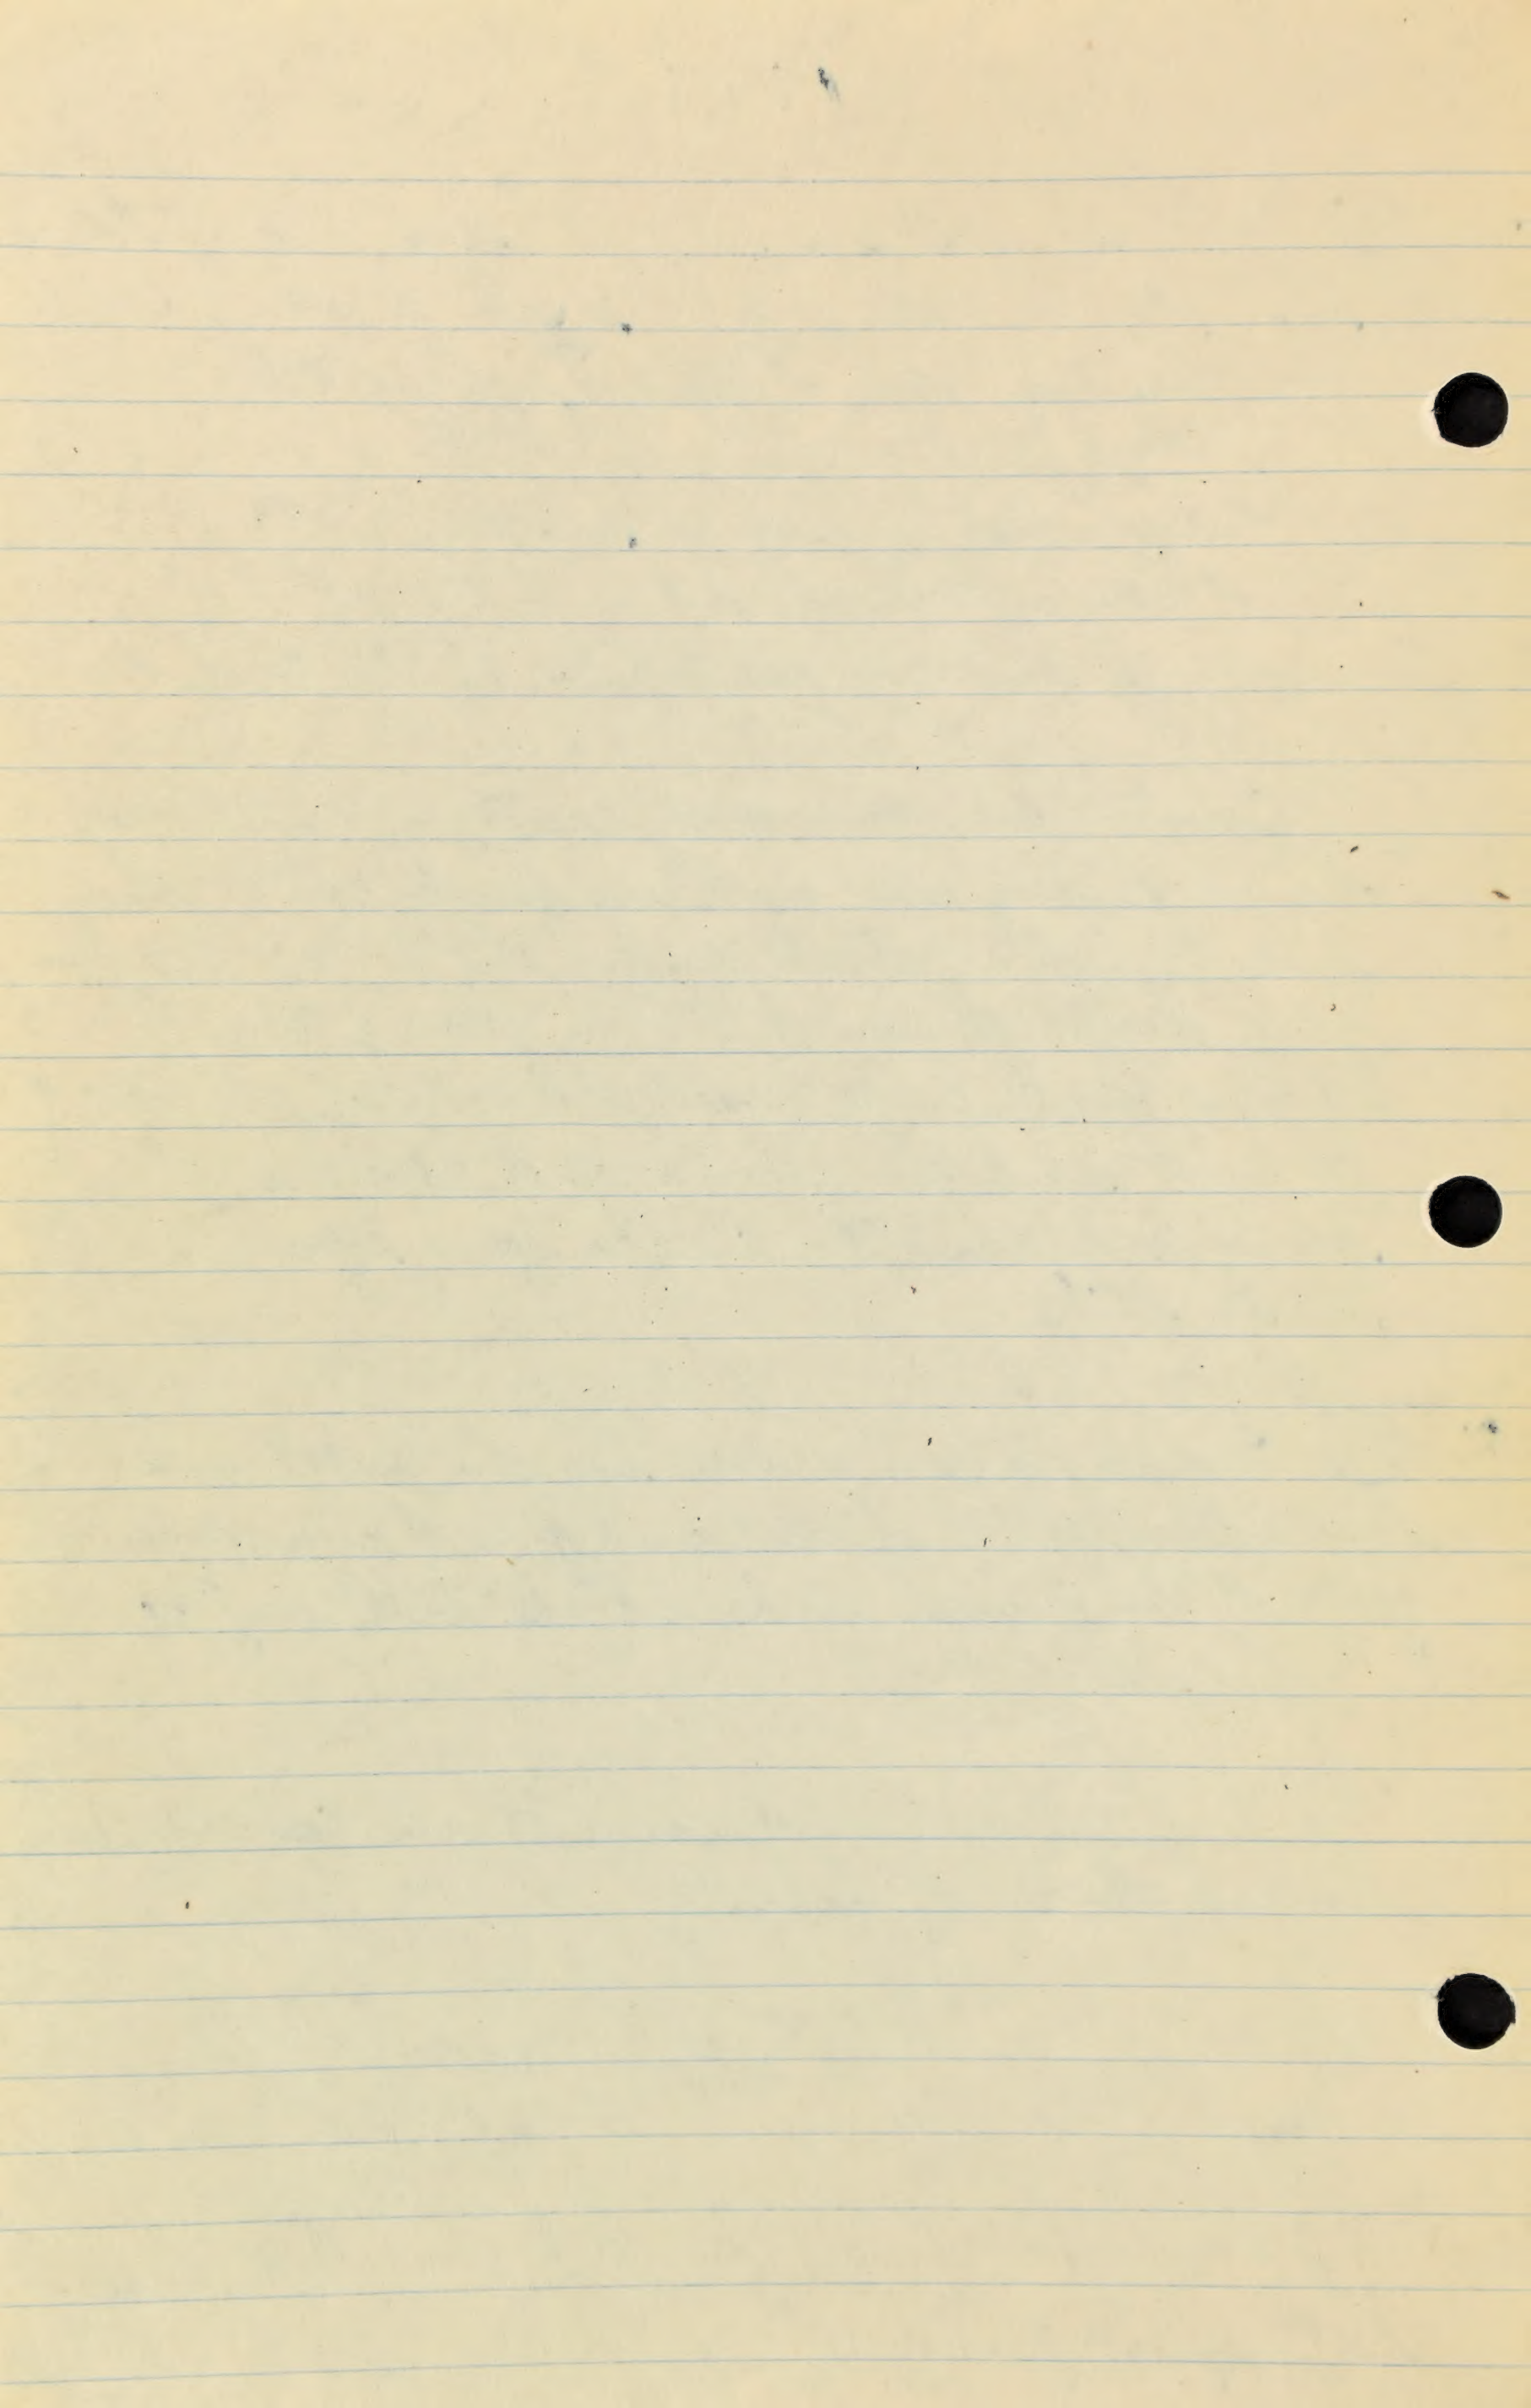

- Unum which leaves of hole above the N-E-  
of-one-and tapers to a fine line to the right  
wheat blade also the same wheat blade has a cut  
like impression to the rim and split at the rim  
the second one starts from the left wheat blade goes  
through the O-of the R-of America and the right  
wheat stem The third one starts under the R-of  
America and goes down on a angle through the  
right Wheat blade and ends at the rim there is also  
a metal mound up under the R-.
- U (7) Defected die (on obverse has one incuse starts under  
the Lincoln chin and ends on top of Lincoln tie
- U (8) Defected die (on obverse has two metal rise starts at  
the right of the N-of in and goes around the upper  
rim a heavy ridge In God We Trust the second  
on starts on reverse has a small metal mound  
above the left wheat blade.
- UF (9) Cave in die (on reverse has one metal rise  
starts under the U-S-of Pluribus and goes down  
between the N-and E of one and ends on top of the  
right bar of the N-of cent
- UF (10) Cave in die (on reverse has one metal rose  
starts under the S-and the dot and U-N-of  
Pluribus Unum and goes down and takes  
in the E of one at the left side and ends  
at the upper left side at the E of one  
at the right bottom bar of the E-of one

- u (11) Cave in die (on reverse) has one metal rise starts like no 11 except the ends on the top bar of the E- of cent
- u (12) Cave in die (on reverse) has one metal rise starts under the dot and the U-N- of Union and ends on the top bar of the E- of one
- u (13) Cave in die (on reverse) has three metal rise one is heavy rise and two fine ones. the first heavy one starts under the U- of Pluribus goes down through the right of the E- of one and ends about the side of the E- of cent and the second and third one along side the other in the open space and ends alike.
- u (14) Cave in die (on reverse) has one metal rise starts from the E- of cent and goes down along side of the E and ends at the bottom of the E- of cent.
- u (15) Defected die (on obverse) the L. ~~can~~ slants toward the D- of Liberty
- u (16) Defected die (on obverse) the left side of the B- of Liberty is block out
- et (17) Crack die (on obverse) Lincoln has a crack across the top of his forehead -
